

Guide how to choose your safe

1

Type of installation

Surface-mounted or built-in safes

SURFACE-MOUNTED

The safe is placed on a solid surface, such as the floor or a piece of furniture.

Page 6

BUILT-IN

The safe is installed inside a wall or floor, remaining hidden.

Page 36

2

Level of resistance

Home security, professional, certified, and fireproof

HOME SECURITY

Suitable for protecting moderate-value items such as jewelry or documents against basic theft.

PROFESSIONAL SECURITY

They offer more robust protection against theft, with stronger materials and advanced locks.

DOUBLE-WALLED AND CERTIFIED

Security standards, ensuring a superior level of protection against theft.

FIREPROOF

Specifically designed to withstand fires for 30 to 60 minutes.

3

Locking system

Mechanical (K) or electronic (E)

MECHANICAL

Mechanical locks, such as pin tumbler or lever tumbler locks, offer reliable security and do not depend on electricity.

ELECTRONIC

Electronic locks provide convenience and customization options, allowing the use of PIN codes or biometric systems.

Surface-mounted safes

Easy to install, providing secure protection for home or business.

Standing safes

Safe, accessible, and durable
