

## Compact washing machine SC250 34C B

### Description

The SC250 34C B washing machine is a compact washing machine for fast and efficient cleaning of hard floors. Effective cleaning in both directions is guaranteed, even under furniture.

This machine is light and productive and has a low noise level, making it suitable for daytime cleaning. It is the ideal option for shops, schools, restaurants, cafes, bakeries, fast food chains, hotels, cleaning companies, etc.

The SC250 34C B compact washing machine is a highly productive machine, sweeping, washing and drying at the same time and works both forwards and backwards. Debris, dirt and smaller dust particles are effectively removed with the 34 cm brush. For a more thorough cleaning, you can choose to disable the wipe function and use a microfiber roller.

During cleaning, the front nozzle can be raised to facilitate the collection of larger debris without having to stop. With two different solution flow rates, it can be adjusted to suit cleaning needs. Two easy ways to save time and reduce costs without compromising the bottom line.
