

## Horizontal Wall Baby Changing Station White - Mediclinics

### Description

- Mediclinics' horizontal and vertical diaper changing platforms are built with antibacterial additives and offer a high level of safety, cleanliness, resistance and durability.
- They are the ideal solution for high-traffic public spaces (shopping centers, airports, public buildings, nurseries, etc.).
- Their modern and elegant design allows these changing platforms to blend perfectly into any bathroom environment.
- The Biocote antimicrobial additive, based on silver ion technology, is embedded directly into the plastic itself, making it easier to clean and reducing the proliferation of microbes, which cause illness, odors and stains.
- These standards require diaper changing platforms to withstand a static load test of 50 kg for one hour. In addition, the units tested in our own laboratories have withstood loads of over 100Kg.
- Direct wall installation.
- Made from polypropylene with antibacterial additive included.
