

Electric Fly Killer LED Insect Trap

Description

The CuboHotel electric fly killer is an effective and safe solution for eliminating flying insects in indoor environments. This insect catcher uses a 10W LED lamp to attract mosquitoes and flies through LED light with a specific wavelength.

- The insects are trapped on the high-adhesion glue board, which only needs to be replaced when saturated, with the recommended replacement being once a month. The use of this equipment is simple and fully hygienic, with no smoke, odours, aerosols, noise or pollution.
- With a minimalist and modern design, this fly catcher easily adapts to hotels, restaurants, butcher shops, food factories, hospitals and other spaces that require maximum hygiene. Safe for people and animals, it ensures a healthy and comfortable environment.
- Main features:

- [10W E27 LED lamp](#);
