

## Automatic Hand Dryer ABS Silver

### Description

The Automatic Hand Dryer ABS Silver is the ideal solution for hotels seeking to combine efficiency, economy, and comfort in hand hygiene for their guests. With a power of 1,650 W and a fast drying **time between 5 to 7 seconds**, this device offers an ultra-fast air curtain with adjustable speeds up to 95 m/s, ensuring a quick and pleasant experience.

**Designed to save energy**, the unit automatically adjusts the heating power according to ambient temperature, reducing consumption to just 800 W in warmer environments and operating in standby mode at a minimum consumption of 1.5 W.

It **includes a HEPA H13 filter** that purifies the air during drying, a key feature to maintain high hygiene standards in the hotel's common areas. The removable tray collects residual water, making cleaning and maintenance easier. **The brushless motor significantly reduces operational costs, ensuring an estimated lifespan of 7 to 10 years (1000 daily uses).**

[Automatic Hand Dryer ABS Silver](#)

Installation is simple thanks to the included bracket, accompanied by a complete manual with a detailed guide and wall-mounting template. It is recommended to position the unit at a minimum regulatory distance of one metre from water sources. The modern design in silver ABS combines durability with a discreet aesthetic that easily integrates into the sophisticated environments of hotels.

For managers responsible for the purchasing department or directors seeking a reliable and economical solution that enhances the sanitary standards of hotel facilities, this model represents an excellent quality/price ratio, combined with the advanced technology required in an increasingly demanding market.

Its smart functionality ensures complete safety: after the maximum automatic cycle (30 seconds), **it shuts off automatically to prevent waste**. Simply insert hands again to restart.

With **compact dimensions (30 x 70 x 22 cm)**, it fits perfectly into your establishment's bathrooms. Choose this efficient option that combines technological innovation with continuous energy savings, without compromising performance or user comfort.
