

Outdoor Waste Bin Stainless Steel and Coated Iron

Description

The outdoor waste bin in stainless steel and coated iron was developed to meet the demands of outdoor environments with high traffic, offering durability, stability and easy maintenance.

Its structure combines a stainless steel 201 frame with brushed finish and a coated black iron body, ensuring resistance to continuous use and outdoor conditions. The inner container in galvanised sheet allows quick and hygienic waste collection, making the maintenance process more efficient.

With **dimensions of 60 x 40 x 96 cm (length x width x height)** and a thickness of 1.0 mm, it easily adapts to public areas, hotel outdoor spaces and other professional outdoor environments, ensuring practical and organised waste management.
