

Injection Spray Extraction Machine Power Extra 31 Ghibli

Description

The Injection Spray Extraction Machine Power Extra 31 Ghibli is the top-of-the-line model of the Power Extra series, developed for professional cleaning tasks that require maximum capacity, performance and autonomy. Equipped with two suction motors, it guarantees high extraction efficiency even on denser textile surfaces.

The CEME pump provides 60 W of power, a spray rate of 4.5 liters per minute and 6 bar of pressure, enabling fast and uniform application of the cleaning solution. The 31-liter solution tank and the 32-liter recovery tank offer great autonomy, with easy emptying through the drain hose or by completely removing the reservoir.

With an airflow of 142 l/s, vacuum of 225 mbar, noise level of 82 dB(A) and IPX4 rating, this equipment is designed for demanding environments where performance and durability are essential. The 10-meter power cable provides an excellent working range.
