

Description

We think about our safes as a comfort service for the guest and a profit center for your hotel. The hotel safes have the renting option through software.

Rent management system Win.

- From the reception computer the hotel provides an activation code for the safe of the guest.
- This code allows the locking of the safe until to the indicated day and hour.

Room register

- After software setup, the hotel rooms and floors must be configured and registered.
- Rent period selection
- This rent system is very simple. Room number and day - hour of deactivation.
- The program facilitates a special code that activates the room safes during the defined period and prints a contract-ticket.

Activation code ticket

- The ticket shows the activation code that allows the locking of the safe until the set day and hour.
- The guest only must key in the keypad R, C and the activation code to activate the safe.
- When contracted period has finished, the guest can open the safe but not lock it.
