

Description

The foldable grab bar was designed to provide additional support and safety in bathrooms, being suitable for hotels, hospitals and spaces adapted for people with reduced mobility. It provides firm support in areas such as toilets, bidets or shower zones, facilitating user movement.

The articulated system with vertical rotation allows the bar to be folded when not in use, contributing to better space management. The structure was developed to ensure stability and resistance in intensive use environments, maintaining reliable performance over time.

- **Technical features:**

- Made of AISI 304 stainless steel with bacteriostatic brushed finish;
- Dimensions: 800 x Ø32 mm (length x diameter);
- Fixing plate: 300 x 100 mm (height x width);
- Includes braking system;
- Includes stainless steel screws;
- Includes anti-conductive kit;
- Recommended installation height: 70 to 75 cm from the floor.

- **Maintenance:**

- Stainless steel requires maintenance, as dirt over time may damage the chromium (Cr) contained in it. Monthly cleaning with a specialized stainless steel product is recommended.

Invest in a functional, resistant solution adapted to the accessibility requirements of your facilities.
