

## Description

The angled grab bar is an essential solution to reinforce safety in bathrooms, being especially suitable for hotels, hospitals, care homes and spaces adapted for people with reduced mobility. The 90° angle design allows support in two directions simultaneously, facilitating movements such as sitting and standing.

It stands out for its L-shaped configuration with three fixing points, ensuring greater stability and safety during use. Its design allows versatile installation next to toilets, bidets, showers or bathtubs, adapting to different support needs.

- **Technical features:**

- Made of AISI 304 stainless steel with bacteriostatic brushed finish, offering high corrosion resistance;
- Dimensions: 700 x 400 mm (length x length);
- Bar diameter: Ø32 mm;
- 90° angled configuration with three fixing points;
- Position: left;
- Includes stainless steel screws;
- Includes anti-conductive kit.

- **Maintenance:**

- Stainless steel requires maintenance, as dirt over time may damage the chromium (Cr) contained in it. Monthly cleaning with a specialized stainless steel product is recommended.

Invest in a safe, resistant solution adapted to the accessibility requirements of your facilities.
