

Description

The Individual Recycling Bin Glass Painted 45L Black is the ideal solution for spaces that value organization and sustainability such as hotels shopping centres commercial centres and airports.

Manufactured in Portugal this container is built in 0.8 mm metal sheet coated with resistant black paint which ensures durability and an elegant finish. With a hinged lid with hinge painted in the corresponding colour of selective recycling it facilitates identification and correct use of the container.

The central opening hole of 115 x 115 mm was designed to receive glass in a practical and safe way while the vinyl lettering reinforces the recycling message promoting environmental awareness. The internal ring allows suspending the plastic bag facilitating cleaning and maintenance and the rubber supports at the base prevent damage to the floor.

With a **capacity of 45 litres and compact dimensions of 74.5 x 25 x 25 cm (height x width x depth) it is suitable for indoor environments or covered outdoor areas** offering versatility and functionality. For outdoor use we recommend stainless steel models.

Characteristics:
