

Description

Designed to be used with disinfectant, the 60x90 Disinfection Mat's containment edge can hold up to 4.5 liters of disinfectant per square meter and the raised waffle design wipes dirt off the soles of shoes and ensures excellent skid resistance. The WH surface is 100% polypropylene and therefore fade and rot proof. The extra weight of the mat also means that it will remain stable, even in windy outdoor conditions.

The backing of the mat is 100% rubber, ensuring that the mat stays flat and secure on the floor, is more non-slip and the rubber edges won't curl in cold weather. The mat's ramp edge reduces the risk of tripping and the rubber flexibility ensures that the edges don't tear. This results in high durability and provides long-lasting performance and appearance.

- 5-year manufacturer's warranty.
- 11-year guarantee against significant color loss.
- Made in Europe.
- Suitable for busy entrances and ideal both indoors and outdoors.
- Can be cleaned with a vacuum cleaner or steam cleaner.
