

## Description

The SMART hospitality tray was developed for hotels and guest accommodations that need a compact, practical and elegant solution to organise coffee and tea service in the room. Made of high-quality plywood with a black beech veneer, it combines durability with a modern and discreet finish, suitable for any décor style.

Its ultra-compact design allows hotels to offer courtesy amenities even in rooms with limited space. The tray includes a wide drawer, protected against dust, where tea bags, sugar, creamer, instant coffee, spoons and other condiments can be stored. The removable internal dividers allow the drawer layout to be customised according to the hotel's needs, making it a versatile solution.

For added functionality, the model includes cable-routing guides on the left, right and rear, making it easy to use electric kettles without compromising organisation. The base features 4 transparent protective gliders, ensuring stability and protecting furniture surfaces.

### Main Features:

- Made of plywood with black beech veneer;
- Also available in:
  - Black PU leather: [CB1309P](#);
  - Beige PU leather: [CB1309B](#);
- Water-resistant coated finish;
