

## Description

The matte black MDF coffee capsule box is the ideal solution for hotels, guest accommodations and corporate spaces that want to offer an organised, hygienic and visually refined coffee service. Designed for areas with limited space, it combines an elegant design with excellent functionality, providing guests with a premium experience.

**Manufactured in high-quality MDF**, it is treated with multiple layers of pigmentation that reduce the absorption of dirt and humidity, ensuring greater durability in hotel environments. The matte black finish gives it a modern and sophisticated look, keeping the surface well presented over time.

The model includes a removable **double-sided insert that allows storage of 4 or 6 classic Nespresso® capsules**, and can also be used without the insert when other items need to be stored. The internal compartments have rounded corners, making daily cleaning and maintenance easier.

In addition to capsules, the box was designed to store spoons, sugar sticks, milk sticks and other condiments, keeping everything organised in one place. The lid protects the contents from dust and ensures an impeccable presentation. The base includes 4 protective gliders that prevent scratches on furniture.

With a compact design and ultra-optimised dimensions, this box easily adapts to hotel rooms, courtesy trays, coffee amenities or reception areas.
