

## Description

- Chariot made using a modular system, ideal for creating simple structures.
- The parts are produced in AISI 304 stainless steel by casting.
- In addition to using stainless steel, they also use special non-galvanic and non-polluting finishes, such as the titanium finish achieved using PVD (Physical Vapor Deposition) technology.
- Finish: Matte
- Soft to the touch.
- Very easy fixing system, with just screws to ensure that all the elements are tight.
- Sold by the piece: Tubes / Fittings / Connectors / Bases / Etc.; to create the structure according to the customer's taste.
- Optional: Hangers in AISI 304 + Leather (Dark Brown / Light Brown / Black)
- In addition, the components can be produced with a PVD finish in different colors such as black, copper or gold.
- With this system you can create other structures such as furniture, decorative elements, structural partitions, etc. (Consultenos)

With this system your imagination knows no bounds, find out more [here](#).
