

Description

Washable rubber mat with anti-fatigue and anti-microbial properties

The inorganic antimicrobial characteristics are built-in to inhibit the growth of bacteria, such as E-coli and Staphylococcus Aureus.

Kleen-Thru+ features a resilient nitrile rubber construction that eases the fatigue of long-standing jobs in the kitchen or behind the bar, and also helps prevent impact breakage. A textured surface offers secure footing and the specially placed holes contribute to drainage and cleanliness. Oils and grease will not break down the all-nitrile rubber construction.

Kleen-Thru+ has low profile borders to facilitate cart traffic. The reduced weight allows for easy handling and cleaning.

Why choose Kleen-Thru Plus:

- Fully serviceable product
- Anti-fatigue
- Anti-microbial properties
- Slip-resistant
- 100 % rubber
- EN 13501-1 tested
- PVC-free
- Made in Europe

APPLICATIONS:

- Ideal for kitchens, wet areas, bars, production halls

MATERIALS:

- 100 % Nitrile rubber with anti-microbial active substances

*All measurements have a tolerance of $\pm 5\%$.
