

## Description

- VIPER BV3 carpet dryer offers a powerful and cost-effective way to dry carpet, even for large areas. It can also be used to move air in areas with little ventilation such as dressing rooms and bathrooms. It is the ideal solution for hotels, schools, offices, etc.
- The BV3 carpet dryer is very flexible, as it can be placed in different positions to obtain a better drying angle. Up to 3 units can also be connected in series when a greater air flow is required. The unit weighs just 10 kg, making it very easy to transport and store.
- It has a new 3-speed induction motor, with thermal protection, which saves energy and costs. It is also protected by a robust rotomolded housing, which allows it to work in all conditions. Due to its long useful life and low energy consumption, it ensures a low total operating cost.
- Cost-effective: new 3-speed induction motor with reduced energy consumption.
- Reliable: protected against engine overheating and with a robust rotomolded housing.
- Flexible: easy to place at the desired blowing angle.
- Compact: designed with a modern style to facilitate maneuverability and save space. Up to 3 units can be stacked. It has a support to wind the cable and an optional trolley for transport.
- Flexible carrying handle
- Cable storage
- Voltage: 220-240V
- Cable length: 6.5m
- Frequency: 50/60 Hz
- Weight: 10kg
- Power: 375W (0.5 HP)
- Noise level: 64/68/72 dB/A
- Speed: 1000/1200/1400 RPM
- Working speed: 3km/h
- Air flow, max. 56/62/67m<sup>3</sup>/min
- Rated current consumption 1.1/1.2/1.7 A
- Dimensions: 40.5 x 46.8 x 40.2 cm (Length x Height x Width)
