

Description

- Economical recycling bin with front door.
- **Capacity:** 65L - square shape
 - Other capacity available: 95L - rectangular shape (**MEC50211**)
- Modular: can be installed on its own or in recycling stations made up of several bins joined together. The bins can be joined at the side or at the back, which makes it possible to form stations with an elongated or square shape (joining element between bins supplied with the bin).
- Can be combined with the Turin Plus garbage can versions (**MEC5051**).
- Access to interior for emptying via front door with magnetic lock (optional with triangular key lock, subject to minimum order requirements).
- **Collection systems:** bag retention ring attached and hinged to the body (with access to the ring from the hinged top cover).
 - **Optional:** inner metal bucket with elastic band to secure the bag.
- **Bin opening size available:** 14x14cm (small opening)
 - **Optional:** 19x19cm (large opening)
- Skirting board integrated into the garbage can.
- Includes height-adjustable feet.
- Cannot be anchored to the ground (special optional version available for anchoring to the ground. Subject to a minimum order quantity).
- Made from 1.5 and 2 mm hot-dip galvanized cold-rolled steel sheets.
- Finished with thermosetting polyester resin powder coating.
- Hinges and bag fixing ring in galvanized steel.
- **Suitable for indoor and outdoor use in normal weather conditions.** For extreme weather conditions, such as salinity, high temperature or humidity, an additional special treatment can be included. Please inquire about the additional cost and the minimum order required.
- **Accessories (optional):** Cover (accessory not compatible with the square recycling station made up of containers joined at the back), sign holder, wheels, wall kit, basic front sticker, special front sticker placed on the door, special lid sticker, inner plastic liquid retention tray (only available in the single-ring version).
- **Dimensions:** 30cm x 30cm x 87cm (Length x Width x Height).
