

Description

This electronic key cabinet with a capacity for 144 keys is the ideal solution for hotels, guesthouses, corporate spaces, and environments that require secure key management.

- Made of reinforced steel, the safe features a 4 mm thick door and a 2 mm body, ensuring protection against unauthorized access.
- The electronic system allows codes between 3 and 8 digits for both the standard user and the master user, and includes LED indicators and an acoustic signal to show security and power status.
- The unit runs on batteries and includes an emergency key for mechanical opening.
- In case of low battery, an automatic warning is issued.
- Installation is facilitated through 20 mm anchoring holes on the back panel.
- **Side slot for quick key deposit:** allows you to insert keys through the side slot without opening the safe, ensuring faster and more secure handling for reception and operations teams.
- **Adjustable-height internal shelves:** shelves can be repositioned as needed, allowing you to organize different quantities and key sizes with full flexibility.
- Key features:
