

Description

Hygiene, organization, and modern design for professional spaces.

- This 410 stainless steel trash bin with anti-fingerprint treatment is the ideal solution to keep areas clean, discreet, and organized.
- With a total capacity of 90 liters (3 compartments of 30L each), it allows for practical waste management in different fractions, making recycling easier in hotels, restaurants, offices, and public spaces.
- The 0.5 mm thick stainless steel structure ensures durability and resistance to intensive use, while the fingerprint-proof finish keeps the surface spotless and easy to clean.
- Key features:
 - Material: 410 stainless steel;
 - Thickness: 0.5 mm;
 - Anti-fingerprint treatment keeps the surface clean;
 - Capacity: 30L + 30L + 30L;
 - Inner bins in 410 stainless steel;
 - Dimensions: 96 x 25,5 x 69 cm (length x width x height);
 - Inner bucket: 27,5 x 20 x 62 cm (length x width x height);
 - Robust structure and easy to clean.
- **The standard version comes with identifying vinyl labels for PAPER, PLASTIC, and GLASS in both Portuguese and English, without colored backgrounds**, offering a discreet and harmonious aesthetic.

Two other vinyl label models are also available, one with colored backgrounds and one with colored bands, upon request. If not specified, the standard version is shipped.
- Ideal applications: hotels and accommodations, restaurants, offices, businesses, public spaces, and shopping centers.

Optimize waste management with a fingerprint-proof stainless steel bin, resistant and elegant, perfect for recycling in professional environments.
