

Description

Enhance the safety of your guests' belongings with the Dubai Hotel Safe Front with **drawer opening** by Perseo, a solution that combines sophisticated design with practical functionality.

Featuring an elegant glossy acrylic panel, this safe integrates seamlessly into the room's decor, adding value without compromising the discretion required. Its drawer-style opening ensures quick and easy access to stored items, making it convenient for guests.

Specifically designed for hotels that seek excellence in guest experience, it includes a user code configurable between 4 to 6 digits and a 6-digit emergency code for maximum security. It offers a detailed audit of up to 500 events directly on the integrated screen, ensuring full access control.

With an **internal capacity of 16 litres and dimensions of 195 x 450 x 380 mm (height x width x depth)**, it perfectly suits the needs of hotel environments.

Powered by four AA batteries and secured with two robust Ø20 mm screws. The equipment also includes the option of CEU remote control and integration via software for remote management of installed units.

Ideal for hotel managers and purchasing professionals looking to combine advanced security, modern design and operational ease in a single essential product for hotel rooms.

Invest in a reliable solution that protects guests' belongings while adding value to your hotel.
