

## Description

This brushed copper wall hook combines functionality and modern design, making it ideal for hotels that value the blend of durability and contemporary aesthetics.

Manufactured with a 10 mm diameter tube, it ensures superior robustness and resistance, while the chrome finish adds a sophisticated touch to the bathroom environment. The mounting is carried out with a 3 mm thick stainless steel plate and specific screw, ensuring a firm and secure installation on the wall.

Tested for oxidation resistance in a salt spray chamber for over 300 hours, this accessory maintains its quality even under the demanding conditions typical of the hotel sector. For simple and effective maintenance, it is recommended to clean only with water and soap, avoiding abrasive products or solvents that could compromise the coating's shine.

**Dimensions: 52 x 44 mm (diameter x depth).**

With complete mounting accessories included, it is the perfect choice for directors and purchasing managers looking to combine beauty and functionality.
