

## Description

This horizontal wall mounted baby changing station is the ideal solution for hotels seeking to combine functionality, safety and modern design in areas dedicated to little ones.

Manufactured in **antibacterial HDPE and 304 stainless steel**, it features an elegant and resistant brushed black finish, ensuring durability even in high traffic environments.

With a **maximum load capacity of up to 60 kg**, it offers reinforced safety through the adjustable belt that protects the baby during use. Its easy opening and closing system optimizes the available space in bathrooms or common areas, and it is also equipped with side hooks for hanging backpacks or other belongings.

For greater convenience, it includes a built-in holder for disposable liner paper, facilitating hygiene maintenance on site.

Simple cleaning with water and soap is recommended; avoid solvents or abrasive products that may compromise the materials.

The wall mounted baby changing station measures **92 x 53 x 51 cm (height x length x width) when open and only 92 x 53 x 10,5 cm when closed**. Designed to integrate discreetly into hotel spaces, it combines functionality with a subtle design that easily adapts to modern and refined environments.

An intelligent choice for directors and purchasing managers who value superior quality combined with operational ease in hotel facility management.
