

## Description

Discover the ideal solution to equip your hotel rooms with an efficient and discreet device. This 30-liter thermoelectric minibar combines a modern design in black cold-rolled steel with features designed for the comfort of your guests and for optimizing your unit's energy consumption.

With **dimensions of 475 x 380 x 380 mm** (height x width x length), it easily adapts to different spaces, offering sufficient capacity to store essential drinks and snacks.

Developed especially for environments that require silence, the device **operates without noise**, ensuring a peaceful experience for guests. Its low energy consumption and CFC-free system reflect a sustainable commitment allied to operational economy. Equipped with an adjustable thermostat and automatic defrost, it allows maintaining ideal temperatures between 5°C and 8°C inside, ensuring constant freshness of stored products.

The internal LED light provides soft illumination that facilitates access to the content without disturbing the environment. Ideal for directors and those responsible for hotel purchasing who seek to combine quality, energy efficiency, and comfort with a robust and silent product. Invest in a reliable solution that raises the standard of services offered in your hotel.
