

Description

The stainless steel waste bin is the ideal solution to maintain organization and hygiene in various environments. Made of 201 stainless steel, this product offers durability and corrosion resistance, ensuring long-lasting use even under demanding conditions.

With **dimensions of 38 x 20 x 63 cm (length x width x height)**, the stainless steel waste bin is designed to easily integrate into different spaces. Its thickness of 0.6 mm provides robustness, while the galvanized sheet inner container facilitates the removal and replacement of paper.

This semi-round model is perfect for installation in public restrooms and common areas that require a robust waste bin that does not take up space. Its smooth and discreet surface contributes to a more organized and easy-to-clean environment, making it a functional choice.

Invest in the stainless steel waste bin and elevate the hygiene and aesthetic standard of your spaces.
