

Description

This hygienic set for ostomates has been carefully designed to provide maximum functionality and hygiene in high-demand public environments such as hotels, airports and hospitals.

Manufactured in AISI 304 stainless steel with brushed finish, it combines durability with easy maintenance. The countertop with integrated toilet features a front lid that allows practical access for installation and cleaning, ensuring safety thanks to its fully welded construction, without sharp edges or dangerous corners.

Fixed directly to the wall, **the structure measures 43.8 x 72.5 x 50 cm (height x width x depth).**

This set includes: integrated mirror, toilet paper roll holder, resistant hanger, built-in cistern and essential accessories such as soap dish and gerontological taps and bidet tap.

To preserve the quality of the material, monthly cleaning with stainless steel-specific products is recommended, avoiding damage to the chromium present in the metal composition.

Ideal for those seeking a robust and practical solution that meets the strictest sanitary standards in these public locations.
