

Description

This hygienic brush holder in AISI 304 stainless steel is the ideal solution for public spaces such as hotels, shopping centers and commercial areas.

With a brushed finish, this accessory offers superior corrosion resistance and extended durability even in environments with frequent use. Its compact **dimensions of 415 x 88 x 109 mm (height x width x depth)** allow practical installation without compromising the available WC space.

The holder includes a wall-mounting plate with two firm points and concealed screws, ensuring a clean and sophisticated appearance while maintaining the stability required for intense daily use.

The robust structure securely supports toilet brushes, facilitating the organization of essential sanitary hygiene equipment.

To maintain the original shine of brushed stainless steel, monthly cleaning with specific products suitable for the material is recommended.

This accessory perfectly combines quality, discreet aesthetics and ease of maintenance for any public bathroom that demands high standards of hygiene and presentation.
