

Description

The outdoor waste bin in 201 stainless steel with brushed finish is a resistant and elegant solution for professional outdoor spaces. Designed for high-traffic environments, it combines durability and low maintenance, maintaining a clean appearance even with constant exposure to outdoor conditions.

Manufactured in 201 stainless steel with a thickness of 1.0 mm, it offers structural stability and corrosion resistance, making it ideal for hospitality areas, public spaces and exterior zones of commercial buildings. The inner container in galvanised sheet simplifies waste collection and ensures hygiene and speed in the cleaning process.

With a **diameter of 49.5 cm and a height of 80 cm**, this waste bin provides suitable capacity for frequent use, keeping the space organised and visually balanced. The brushed finish adds a modern and discreet touch, ensuring harmonious integration with different architectural styles.

A robust, functional and aesthetically versatile option for projects that value quality, durability and efficiency in outdoor waste management.
