

Description

The outdoor waste bin in coated iron with grey finish was developed to meet the needs of outdoor spaces with intensive use. Its solid structure, manufactured in coated iron with a thickness of 1.0 mm, ensures high resistance to daily use, even in high-traffic public areas.

Equipped with an inner container in galvanised sheet, it facilitates waste collection and regular maintenance, making cleaning processes faster and more efficient. Its **diameter of 49.5 cm and height of 80 cm** provide adequate capacity for outdoor environments that require continuous waste management.

The grey finish gives a discreet and harmonious appearance, allowing easy integration into gardens, parks, hotel outdoor areas, condominiums, commercial spaces and other professional outdoor areas. Its robust construction and functional simplicity make this waste bin a reliable solution for prolonged outdoor use.
