

Description

The foldable luggage cart with red carpet was developed for hospitality operations and reception areas that require mobility, resistance and a refined presentation. Its stainless steel structure with 0.6 mm thickness and 25 mm diameter tubes ensures robustness even under frequent use, maintaining stability while transporting suitcases and heavier items.

With a gold finish, the equipment integrates easily into hotel environments, providing an elegant and professional appearance. The platform covered with red carpet helps protect luggage from scratches and impacts, contributing to a more efficient and organised welcome service.

The foldable system facilitates storage when the cart is not in use, an important advantage in reception areas with limited space. Equipped with two 6" universal wheels, it ensures smooth movement and easy manoeuvrability, even in narrower corridors.

With **dimensions of 55 x 70 x 120 cm (length x width x height)**, this luggage cart was designed for hotels, accommodation units and other professional spaces that need a reliable, practical and low-maintenance solution for luggage transport.
