

Description

This vertical changing table is the ideal solution for spaces that need a practical and hygienic area for changing diapers for babies up to 12 months or weighing less than 11 kg.

With **dimensions of 87 x 49 x 45 cm (length x width x height)**, this equipment was designed to optimise space thanks to its foldable design that allows closing the changing station when not in use, facilitating organisation and maintenance of the environment. Thickness of the closed changing table: 13 cm.

Made of **antibacterial HDPE**, it ensures a safe and easy-to-clean surface, helping to minimise the risk of cross-contamination, essential in places such as hospitals, restaurants, hotels, shopping centres and malls.

The changing table includes an adjustable safety strap, ensuring safe and comfortable use for the baby during changing. For greater hygiene, it is possible to place a disposable liner or blanket between the child and the changing surface, providing peace of mind to users.

This equipment is practical, safe and designed for public environments that value convenience and the well-being of families.
