

Description

The HEPA Filter for the [CB2305](#) Hand Dryer was developed to ensure greater hygiene and air quality during the drying process. The HEPA filter is capable of retaining ultrafine particles, including dust, pollen, mites, bacteria and other microscopic contaminants, contributing to a safer and cleaner environment in spaces with high foot traffic.

With **dimensions of 12.5 x 7 x 1.1 cm (length x width x height)**, this filter fits perfectly into the [CB2305](#) model, ensuring efficient filtration without compromising the dryer's performance.

It is an essential component to maintain the equipment's ideal performance and ensure a more hygienic and reliable user experience.
