

## Description

Injection Spray Extraction Machine Power Extra 21 Ghibli was developed to meet the needs of high-intensity professional cleaning, offering greater capacity and autonomy when compared to more compact models.

With a 21-liter solution tank and a 22-liter recovery tank, it is ideal for operations that require extended work cycles, ensuring efficiency in cleaning carpets, moquettes, textiles and upholstery. The integrated pump ensures consistent spraying at 7 bar, allowing uniform application of the cleaning solution.

Suction performance is ensured by a flow rate of 71 l/s and a vacuum of 235 mbar, guaranteeing effective extraction even on denser fabrics. The noise level of only 60 dB(A) and the IPX4 rating make it suitable for continuous professional use, with operational safety and comfort.

It includes the essential standard accessories for professional extraction: upholstery nozzle, 3-meter flexible hose, floor nozzle and nylon protection filter.

With a weight of 18.5 kg and **dimensions of 90 x 53 x 52 cm (height x width x length)**, it offers stability and robustness while maintaining ease of handling and transport. The 10-meter power cable ensures greater reach without the need for constant socket changes.

The Power Extra 21 is the right choice for professionals who require greater capacity, autonomy and consistent performance in cleaning textile surfaces in demanding environments.
