

Description

The Outdoor Stainless Steel Ashtray Bin is a practical and elegant solution to keep outdoor spaces clean and organized. Manufactured in stainless steel it offers high durability and good resistance ensuring long lasting performance even in exposed environments.

With a capacity of 43 liters and dimensions of 40 x 32 x 85 cm (length x width x height) it was designed to integrate easily into different spaces such as leisure areas public walkways or building entrances. The thickness of 1.0 mm ensures a solid structure suitable for frequent use in high traffic areas. The internal bucket is produced in galvanized sheet. Ashtray fixed to the bin (not removable).

In addition to its usefulness the Outdoor Stainless Steel Ashtray Bin helps preserve the cleanliness and good appearance of the surrounding environment encouraging correct waste disposal and contributing to reduce the accumulation of litter. A choice that combines functionality resistance and a discreet design for outdoor spaces.
