

## Description

---

This **8" (20 cm) directional wheel** for luggage cart is the ideal choice for hotels and resorts that seek to improve the mobility and control of their transport carts, ensuring greater efficiency in daily operations.

Manufactured with high quality rubber, it ensures smooth and silent movement, without marking the floor, contributing to the preservation of surfaces. Its resistant metal structure offers secure and durable fixing, even in intensive use environments.

With 360° rotation, it allows more precise maneuvers and facilitates cart handling in reduced spaces, corridors and high traffic areas.

Ideal as a replacement part, it is a practical solution for maintenance of carts with damaged wheels, avoiding full equipment replacement and ensuring service continuity. **Wheels supplied without fixing screws.**

Compatible with model [CB2792P](#), this wheel combines durability, control and ease of use, making it essential for professional luggage transport operations.
