

Description

This recycling bin with 4 compartments was designed to facilitate efficient waste separation in professional environments, being especially suitable for hotels, offices, shopping centers and high-traffic spaces. It allows organizing different types of waste in a single unit, promoting sustainable practices in daily operations.

With four independent top openings, it allows separation by categories such as paper, plastic, glass or organic waste, adapting to the specific needs of each space. Each module can be identified with stickers sold separately. The front signage with icons makes waste identification easier, making use more intuitive for users and cleaning teams.

The modern and discreet design, with a neutral tone finish and **approximate dimensions of 103 x 25 x 74.5 cm (length x height x width)**, allows harmonious integration into different environments, from common areas to service zones. The compact structure helps keep the space organized without compromising aesthetics. Suitable for **indoor use or outdoor use only in covered areas**.

Invest in a practical and functional solution to improve waste management and reinforce your environmental policy.
