

## Description

Compact and functional, this 0.6L electric kettle was developed for use in hotel rooms, local accommodations and other professional environments that value guest comfort and safety. It allows preparing hot drinks quickly and conveniently while taking up minimal space.

The double-wall design maintains water temperature for longer and ensures a cool-touch exterior, reducing the risk of burns. The 360° rotating base allows easy use from any position, while the Strix thermal controller ensures consistent and reliable performance. The integrated filter provides a clean pour, and the concealed heating element simplifies cleaning and maintenance.

- **Technical features:**

- Capacity: 0.6 L;
- Power: 900–1100 W;
- Double-wall structure with thermal insulation;
- Cool-touch exterior for greater safety;
