

Description

The Black Queue Management Post with Red Belt is an ideal solution for organizing and controlling the flow of people in various environments. Made of 201 stainless steel, this post combines durability and elegance, ensuring a sophisticated presentation while meeting functional needs.

With a belt measuring 2 meters in length and 48 mm in width, it allows you to delineate waiting areas and efficiently guide the public. The dimensions of the post are **32 x 6.3 x 89 cm (length x width x height)**, providing a stable and visible structure. The material thickness is 0.6 mm, ensuring robustness without compromising the design.

The flat base of the product offers greater stability, making it perfect for locations with high foot traffic. The black color of the post and belt adds a modern and discreet touch, adapting to different settings, from corporate events to reception areas.

Choose the black queue management post with red belt to optimize queue management and improve the experience of your visitors. This product is essential for those seeking efficiency and organization in environments with high circulation of people.
